VOICE AI FOR PROPERTY OPERATIONS

Know why residents call. Own what's next.

Every conversation becomes a clear next step, connected to the property, the issue and the person who owns it.

Request early access See how it works

English and Spanish · Property-aware intake · Human handoff

REAL PLACES. EVERYDAY RESPONSIBILITIES.

A property is more than a dashboard.

The resident | The team | The manager

"I called about this last week."

A returning issue comes with its history, so the resident does not have to tell it again.

"What do I need before I go?"

Location, access permission and the issue travel with the request.

• Most asked

"Where is the work stuck?"

Open follow-ups and repeated requests across the portfolio, in one view.

A SMALL PROPERTY. A REAL CONVERSATION.

Meet Jenny. There when your team can't be.

Jenny answers routine questions and captures requests, then hands anything that needs a person to your team.

- How much is a two-bedroom apartment?
- Do you have a package for unit 208?
- Are pets allowed, and is there a monthly fee?

Jenny · Live voice

One minute. Your questions.
